Those now on hand are warranted to burn the Gas and Smoke, thereby saving 50 per cent. of fuel. These Stoves are from the celebrated Works of

A. BRADLEY, Pitts.

These Patent Gas-Burning Stoves do not choke up with soot and dirt as others will, and have a stronger draft and bake more quickly and evenly. Another great advantage these Patent Stoves have over all others, is, that the Top Plates being double and hollow, they will not warp nor become twisted, as all other Coal Stoves do, thereby saving expense and trouble. We claim for these new Patent Stoves-First, A great saving of fuel.

Second. A much quicker and hotter oven from the same fuel. Third, The preservation of center pieces.

Fourth, Cleanliness, as there is not one-half the dirt and soot that is found in other Fifth, These Stoves all have a draught of cold air back of Fire-Plates, which will
